

EDU AI AGENT SUITE

Governed AI Agents for Education — Built on AWS

Decision-support • human-gated • auditable

The agents are not the product. The governed platform — one MCP authorization gateway, a FERPA/COPPA/IDEA/ADA compliance spine, and a human gate on every consequential action — that makes them deployable across K-12, higher ed, and workforce education is.

EIGHT FLAGSHIP AGENTS, ONE PLATFORM

01 Student & Family Concierge

02 Tutor & Study Companion

03 Educator Copilot

04 Assessment & Feedback

05 Student Success & Engagement

06 Pathway Navigator

07 Document & Accessibility

08 Operations Service Desk

The MCP gateway comes first

No agent touches a system of record directly. One door: verify identity & role • deny-by-default least privilege • human approval on consequential actions • short-lived scoped tokens • PII-masked audit.

Three ways to build it: AgentCore Gateway (managed) • API Gateway + Lambda (primitives) • FastMCP (self-built). Identical controls.

The compliance spine

FERPA • COPPA • PPRA • IDEA / Section 504 • ADA / Section 508 / WCAG 2.2 AA • ~140 state student-privacy laws — enforced in the platform, not just documented.

Bright line: agents never autonomously decide grades, admissions, discipline, financial aid, special-ed eligibility, or placement.

PROVEN IN PRODUCTION ON AWS

94.5%

UA-Pulaski Tech agent adoption; +253% admissions engagement

75%

fewer financial-aid status contacts at Highline College

~1 day

Illinois Tech transcript eval (was 4-6 weeks)

UT Sage

UT Austin faculty-guided Bedrock tutor
